

SOUL Training for Trainers
April 22nd-24th, 2010

SOUL is a political education and organizing skills training center doing our part toward the building of a strong social justice movement. Since 1996, we have trained over 6,000 youth and community activists in radical political education and organizer skills training. We are putting our experience together to help organizations develop the capacity to run political education workshops with their members.

Education is the property of no one. It belongs to the people as a whole. And if education is not given to the people, they will have to take it.
